GREENANGEL ENERGY CORP.**NOTES TO FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED AUGUST 31, 2011 AND 2010****(Unaudited)**

1. NATURE OF BUSINESS AND GOING CONCERN

GreenAngel Energy Corp. (the "Company") was incorporated under the Business Corporations Act of British Columbia on October 26, 2007 as Angelwest Capital Corp. and was a Capital Pool Company ("CPC") as defined by Policy 2.4 of the TSX Venture Exchange (the "TSX"). Effective October 27, 2009, the Company changed its name to GreenAngel Energy Corp. and completed its Qualifying Transaction by acquiring equity interests in certain entities. Its primary business is investing in early stage technology companies that are focused on the production or conservation of energy or energy efficiency improvements.

2. SIGNIFICANT ACCOUNTING POLICIES

The interim financial statements of the Company have been prepared by management in accordance with Canadian generally accepted accounting principles. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the interim financial statements and accompanying notes. Actual results could differ from those estimates. These interim financial statements should be read in conjunction with the most recent annual financial statements. The significant accounting policies follow that of the most recently reported annual financial statements.

7. FINANCIAL INSTRUMENTS AND RISK

Financial Instruments

Under Canadian generally accepted accounting principles, financial instruments are classified into one of the following categories: held for trading, held-to-maturity investments, available-for-sale, loans and receivables and other financial liabilities. The following table summarizes information regarding the carrying values of the Company's financial instruments:

	August 31	Nov 30
	2011	2010
	\$	\$
Cash and cash equivalents - Held for trading	109,002	276,985
Long term investments – Held for trading	2,963,322	2,963,322
Related party loan – loans and receivable	20,000	2,963,322
Accounts payable - Other financial liabilities	13,746	18,898

The estimated fair values of cash and cash equivalents and accounts payable approximate their respective carrying values due to their nature and short terms to maturity. Long term investments are carried at fair value of the investments. The Company tests long term investments for impairment.

Credit Risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash and cash equivalents. The Company limits exposure to credit risk by maintaining its cash and cash equivalents with high-credit quality financial institutions. Deposits held with these institutions may exceed the amount of insurance provided on such deposits. The Company's maximum exposure to credit risk at the reporting date is the carrying value of cash and cash equivalents.

Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company maintains sufficient cash and cash equivalents balances to meet current working capital requirements. The Company is dependent on obtaining regular financings in order to continue as a going concern. Despite previous success in acquiring these financings, there is no guarantee of obtaining future financings. The Company's cash and cash equivalents consist of cash deposited in business accounts and redeemable guaranteed investment certificates held by high credit quality financial institutions. The Company is not invested in any asset backed commercial paper.

Foreign Exchange Risk

The Company does not have significant foreign exchange risk as all of its transactions are in Canadian dollars.

Interest Rate Risk

The Company's exposure to interest rate risk arises from the interest rate impact on its cash and cash equivalents. The Company's practice has been to invest cash at floating rates of interest, in cash equivalents, in order to maintain liquidity, while achieving a satisfactory return for shareholders.
